Editorial policy. The *Journal of Fish Diseases* is an international journal which publishes scientific papers, short communications, review articles and book reviews. The remit of the journal covers all aspects of disease in wild and cultured fish and shellfish. Research papers are accepted on the basis of their originality and the discussion presented. Every paper is read and criticized by reviewers in whose field the paper lies. Where appropriate, reviewers other than those on the Editorial Board are consulted. However, final responsibility for the selection of papers rests with the Editors.

Editorial corespondence. Papers and other material for publication should be sent to the Editors (see Notice to contributors on back inside cover). Other members of the Editorial Board will be pleased to advise overseas contributors.

Subscription rates. The *Journal of Fish Diseases* is published bimonthly and the subscription price for 1986 is £96.00 (UK), £115.00 (overseas) and $190.00 (USA and Canada) post free. The Journal is delivered to North America by accelerated surface post (asp) and subscribers there can expect to receive their copies within 2 weeks of British publication. Current issues for the Indian sub-continent, Australasia and the Far East are sent by air to regional distribution points, from where they are forwarded to subscribers by surface mail. Any back numbers are normally despatched by surface to all regions, except North America, where they are sent asp, and India, where they are sent by air freight.

Business correspondence. All matters relating to orders and subscriptions, back numbers and offprints should be sent to Blackwell Scientific Publications, P.O. Box 88, Oxford, England.
